Pocket Notes

UI Assignment

Objective

To develop this application with HTML, CSS, SCSS, Javascript and jQuery.

Prototype

https://xd.adobe.com/view/76d291a0-c13e-43f0-912b-6a48e8f3641c-2381/?fullscreen

Fonts

- IBM Plex Sans (For Logo)
- Lato

Pages

All pages in Pocket Notes have a dark background (#000)

Page 1: Home

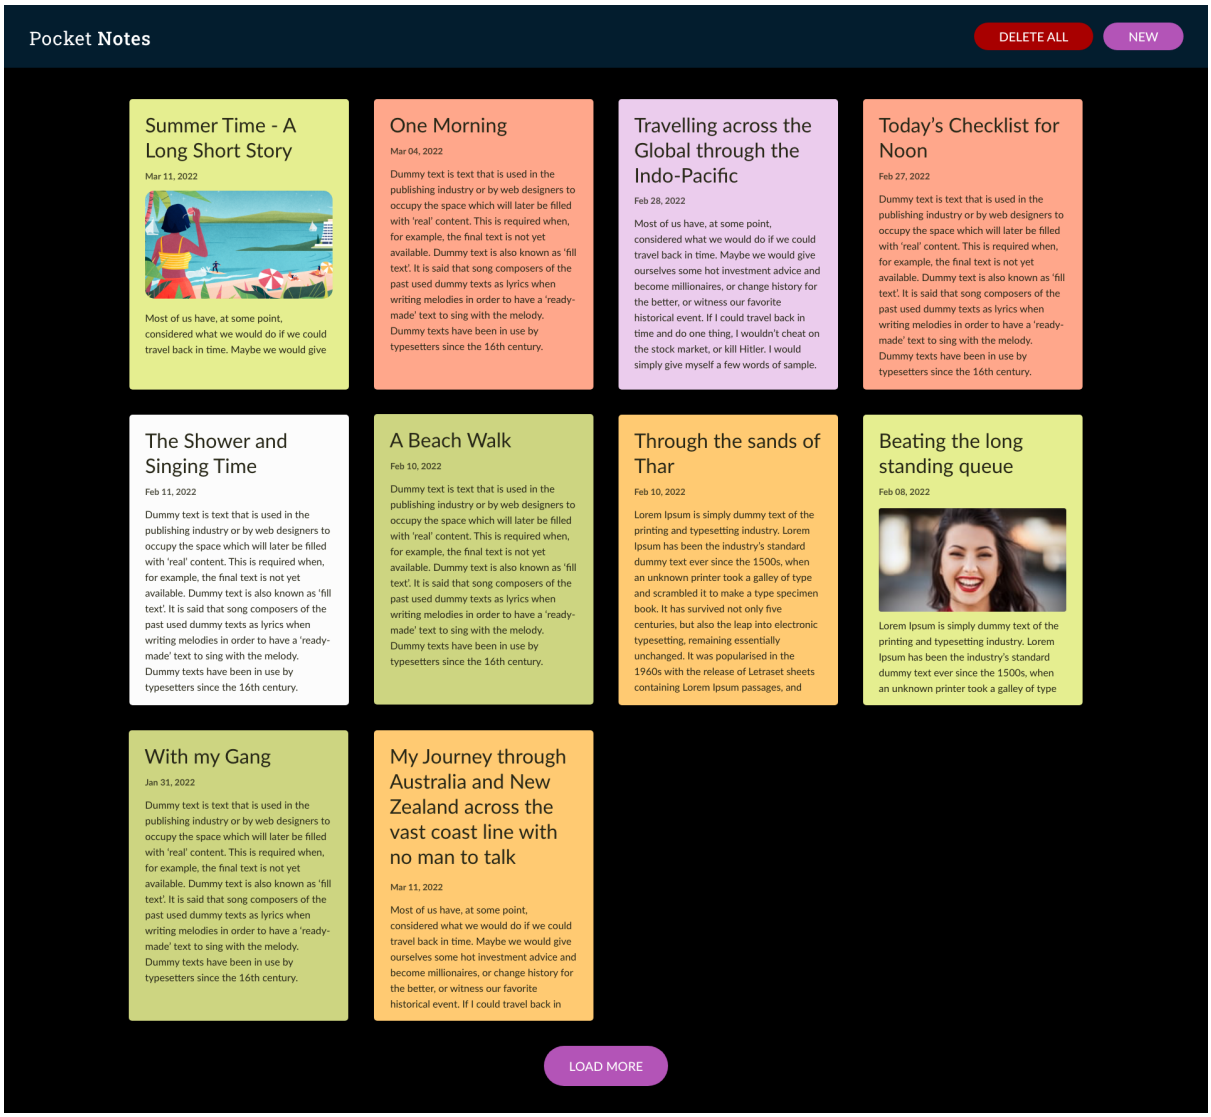

Fig 1: Home

Functionality

1. On load, show all saved notes.
2. Show the list of notes as a list of row and columns.
    a. Show a maximum of 10 notes.
    b. When user clicks on "Load More", append 10 more notes to the current list. The process goes on till all notes are shown.
    c. Hide the "Load More" button, if there are no more notes to show.
3. Adjust the grid size accordingly for different device widths
    1. Mobile (1 in a row).
    2. Tablets (2 in a row)
    3. Small Desktops (3 in a row)
    4. Large Desktops (4 in a row)
4. The notes must be sorted according to the last added or edited date.
5. Each note must have a background color as selected when it was created or edited.
6. On click of a note, navigate to *Page 2: Notes Detail*.
7. On click of "**New**", open the modal as described in *Modal 1* below.
8. On click of "**Delete All**", open the modal as described in *Modal 4* below.
9. Notes must be available even if the browser window is closed and reopened.
10. Header is fixed.

Initially when the user loads the application for the very first time or when there are no notes, present the user with this screen.

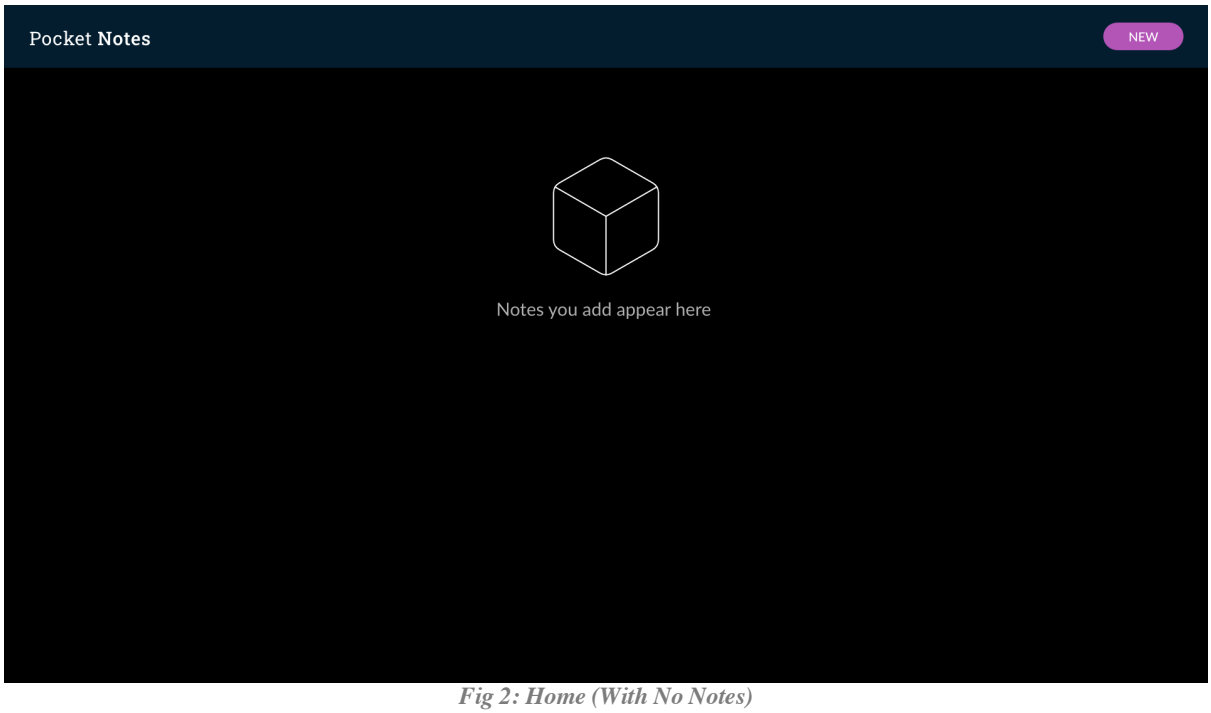

Fig 2: Home (With No Notes)

Page 2: Notes Detail

On click of any note from the *Page 1: Home*, load the entire notes in this page.

Functionality

1. This page is scrollable based on the content.
2. On click of "Edit", open the modal as described in *Modal 2* below.
3. On click of "**Delete All**", open the modal as described in *Modal 3* below.

4. On click of "**Back arrow**" in the header, go back to *Page 1: Home*

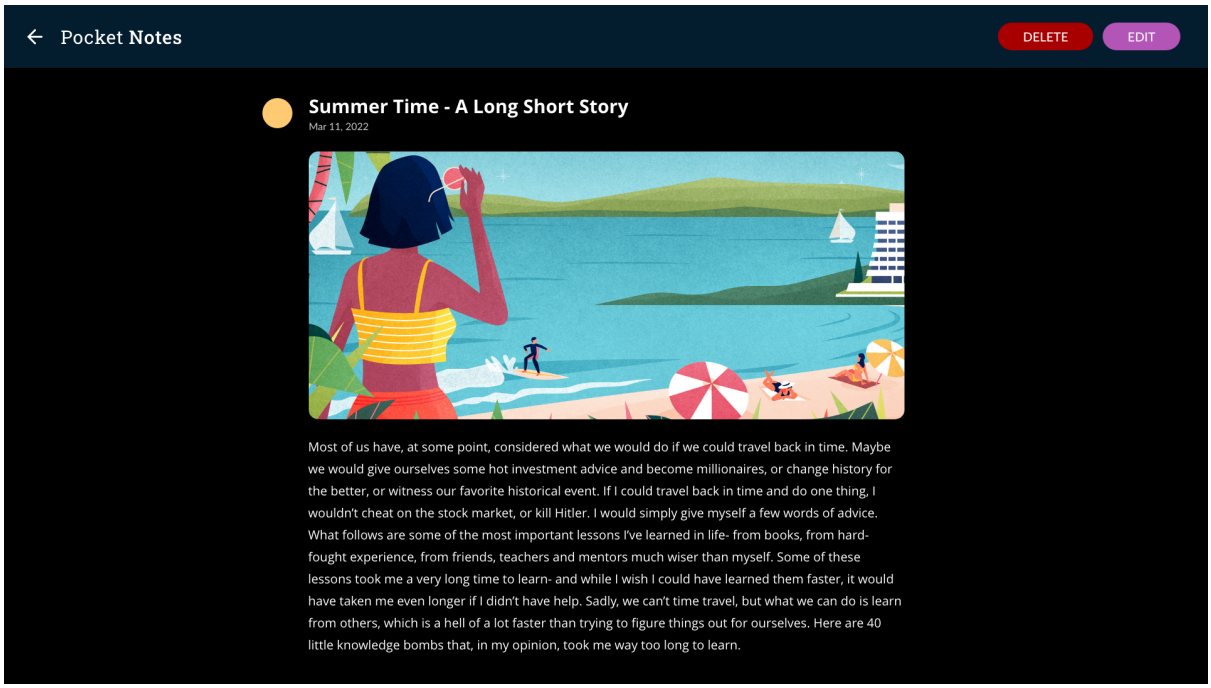

Fig 3: Notes Detail

Modal 1: New Note

P.S: All modals will slide in from right to left.

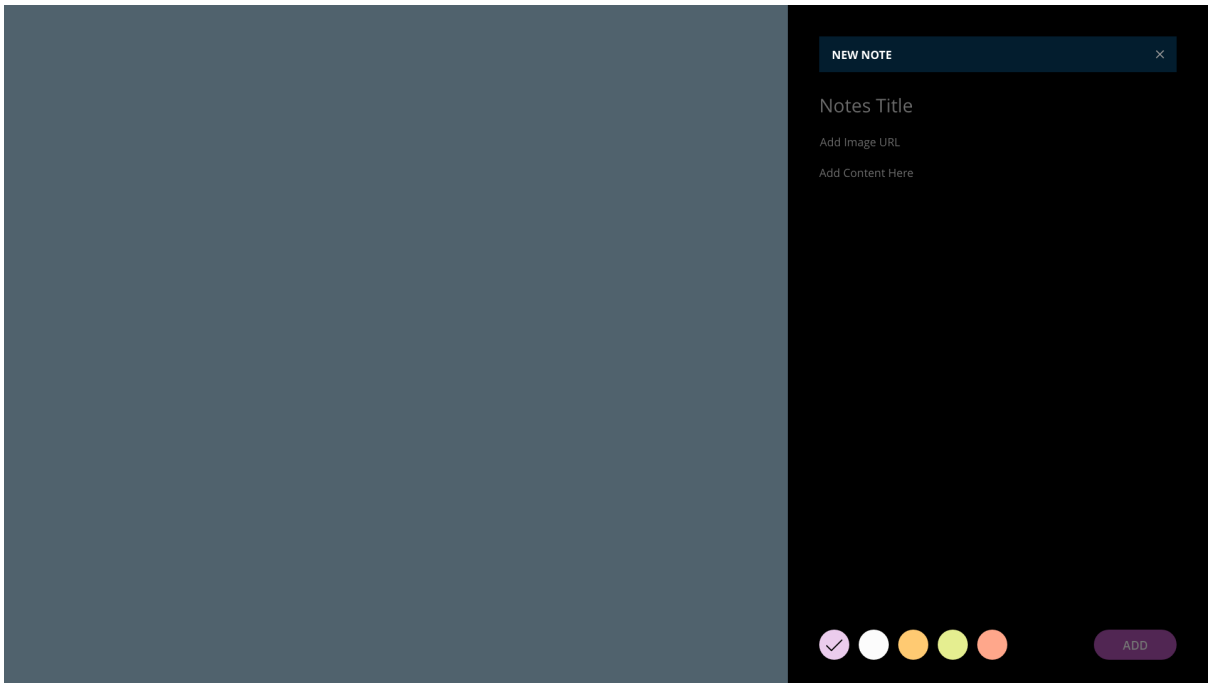

Fig 4: New Note Modal

Functionality

1. Form fields "Notes Title" and "Add Content Here" is mandatory.
    a. Notes Title (Max Length: 100)
    b. Show inline/toast error messages. (*No predefined styling. Developers can use their creativity here*)

2. “Add Image URL” is optional.
3. Color Picker
    a. By default, select the last color which was used while adding or editing a content.
    b. For the very first time, select the first option by default.
4. “Add” button will be disabled till “Notes Title” and “Add Content Here” are keyed in.
5. On click of “Add”, add the note to the list of notes and return to the top of the page.
6. On click of “Close”, return to the page.
7. If the user leaves the modal in between while typing the content, then show the modal as described in *Modal 5* below.

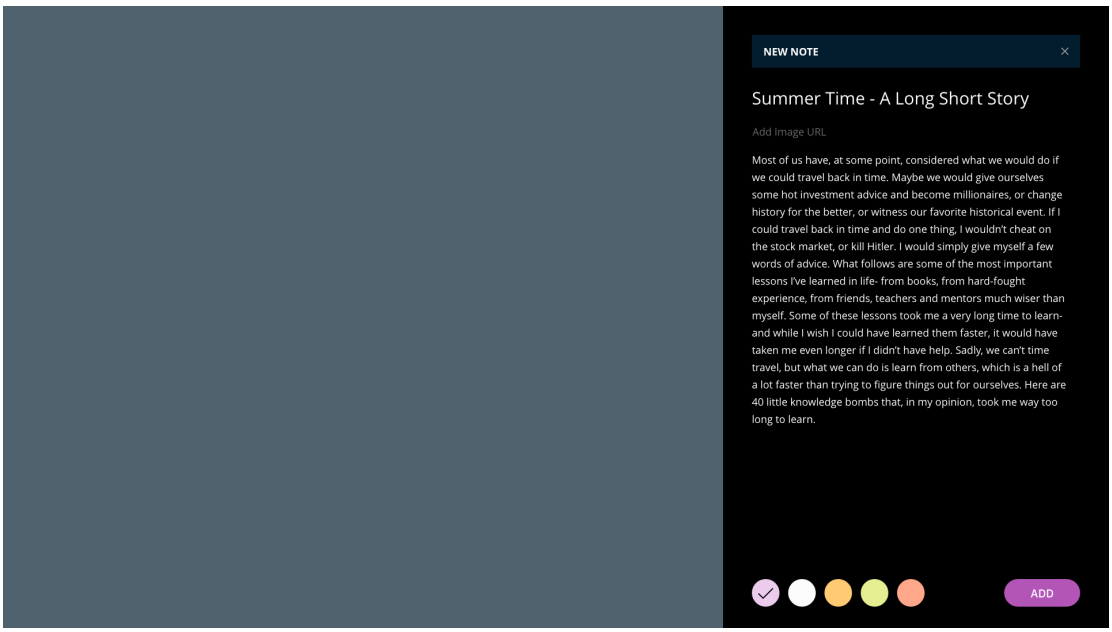

Fig 5: Add Note Modal after filling content

Modal 2: Edit Note

All functionalities are similar to “New Note” functionality.

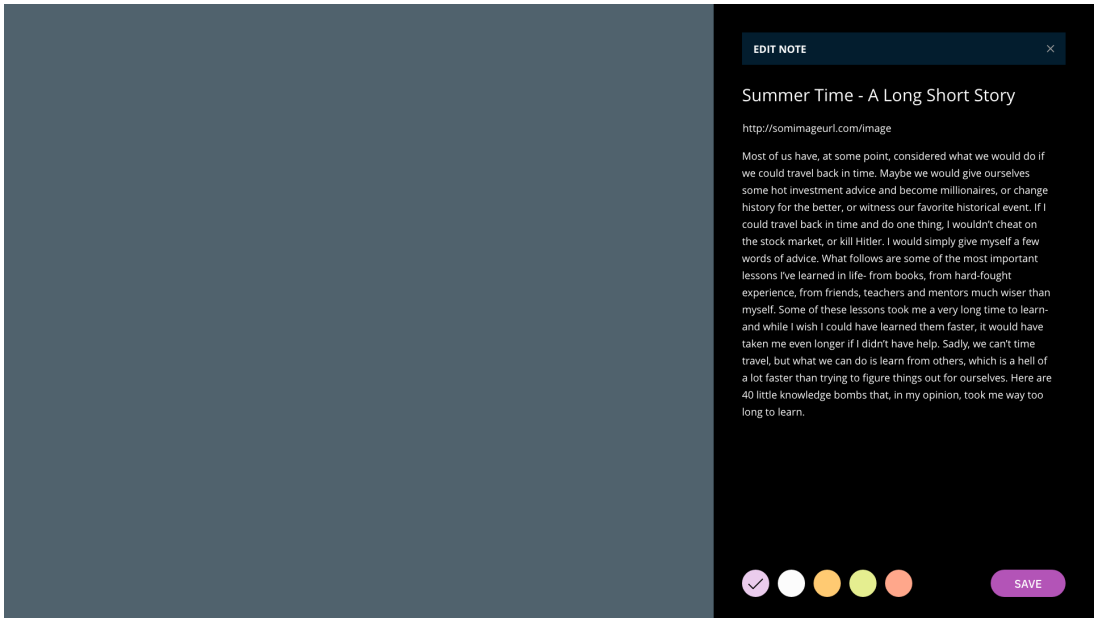

Fig 6: Edit Note Modal

Modal 3: Delete Note
Show this modal, before deleting a note.

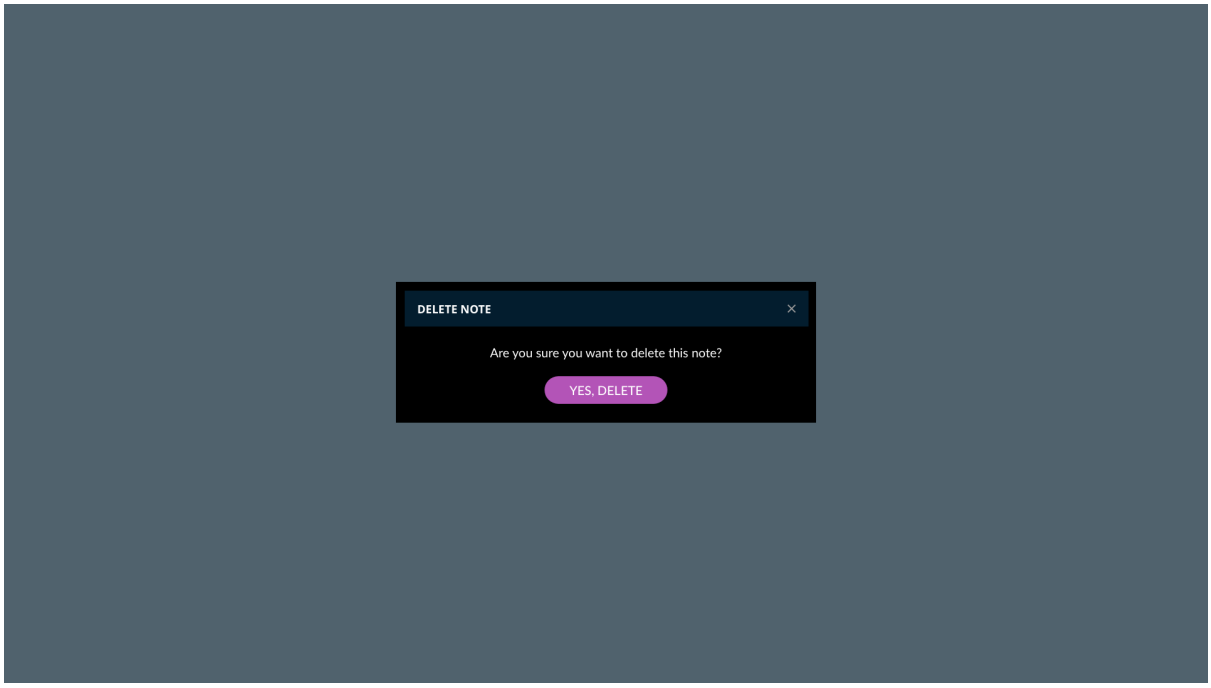

Fig 7: Delete Note Modal

Modal 4: Delete All Notes
Show this modal, before deleting all notes.

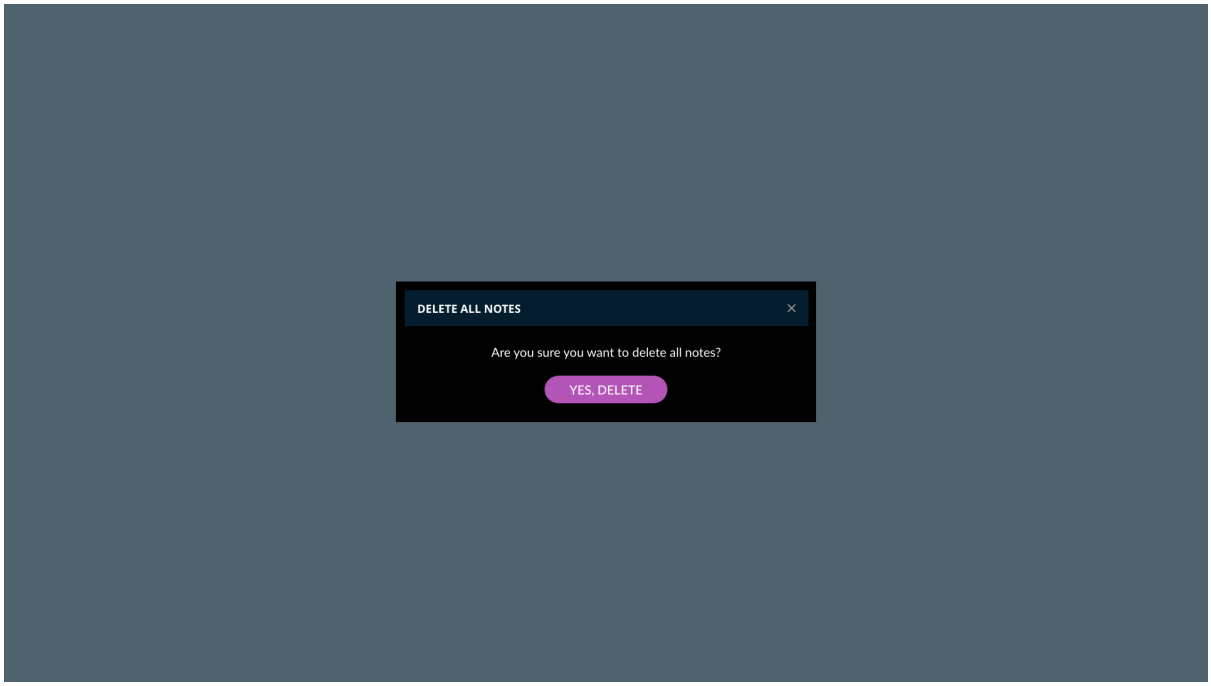

Fig 8: Delete All Notes Modal

Modal 5: Confirm
Show this modal, when a user tries to leave while typing in between adding or editing a note.

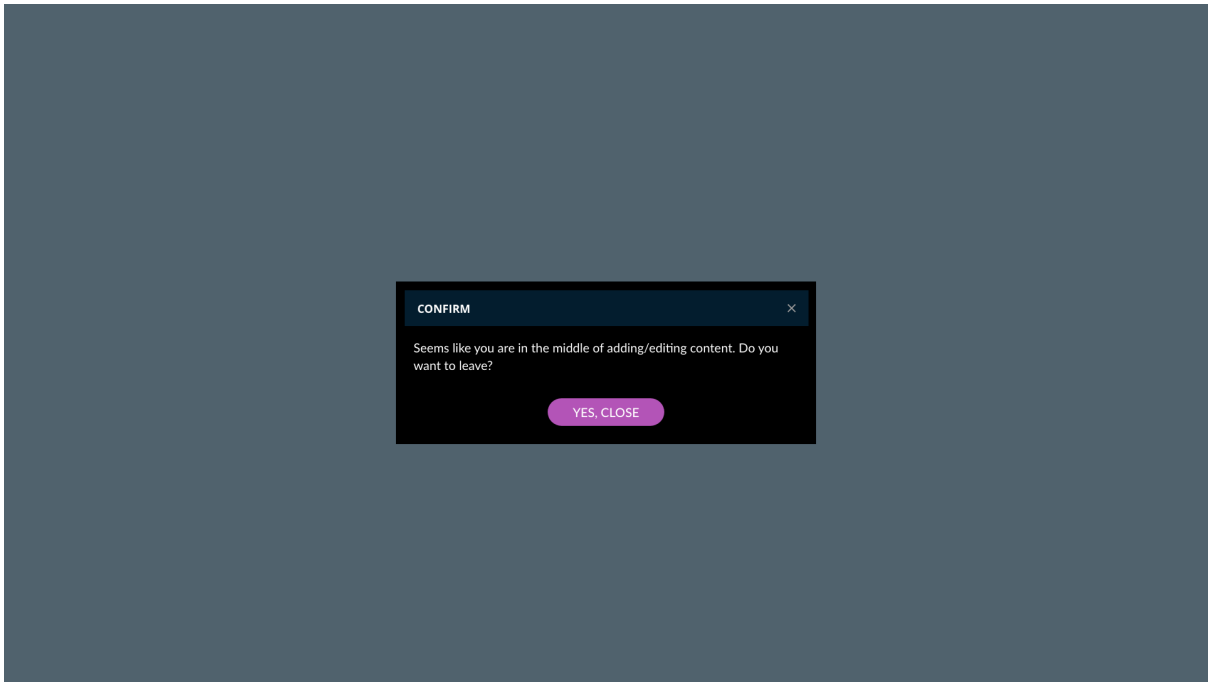

Fig 9: Confirm Modal
